

Workshop Name:

Evacuation and Patient Transportation Skills and Techniques

Workshop Overview:

This course is designed to provide the participant with the knowledge and skills to safely and effectively move and transport patients during an evacuation. Presentations and hands-on training will cover horizontal and vertical movement of patients utilizing various techniques and equipment focusing on insuring that the patient's physical, medical and emotional needs and requirements are met throughout the evacuation.

Recommended Participants:

Nursing Home Administrators, Director of Nursing, Facility Managers, Emergency or Safety Planning Team Members, Nurses and Social Workers.

Course Length:

2.5 Hours

Prerequisites:

None

Continuing Education Credits

Target audience: Registered Nurses, Nursing Home Administrator and Licensed Social Workers/Licensed Clinical Social Workers

This activity has been submitted to WNA CEAP for approval to award contact hours. Wisconsin Nurses Association is accredited as an approver of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

Course Objectives:

Objectives:

1. Discuss the urgent vs. rescue evacuation decision process.
2. Review urgent evacuation triage techniques.
3. Identify patient internal transportation, patient staging and external transportation issues and requirements.

Purpose:

To provide the participant with the knowledge and skills to safely and effectively move and transport patients during an evacuation.
